

DESCARTES™

Descartes Yard Management™

Manage Trailer Movements More Effectively

With Descartes Yard Management™, shipping and receiving staff, gate guards and yard personnel can more effectively manage the planning and recording of trailer moves, inspections and security seal changes, while maintaining an audit trail for loss prevention and government compliance programs like Customs-Trade Partnership Against Terrorism (C-TPAT).

Solution Area

Transportation Management

About the Product

As part of Descartes' cloud-based Transportation Management suite, Descartes Yard Management helps operators manage the movement of trailers and associated inventory.

TOP BENEFITS

- Improved Security and Compliance
- Enhanced Inventory Management
- More Effective Planning with Automated Data Collection

Integrated Solution for Yard Management and Dock Appointment Scheduling

Descartes Yard Management and Descartes Dock Appointment Scheduling solutions integrate with Transportation Management solutions to accept tenders and book appointments, handle automatic door assignments for inbound/ outbound loads, and stage trailers according to door availability. When integrated with a route planning solution, routes can be staged according to door availability and empty trailers in the yard can be assigned to planned routes.

FEATURES

Real-Time Trailer Location Tracking

Track movement and location of trailers in real time across all yards to prioritize trailers for unloading.

Automated Audit Trail

Automatically record all trailer movements and maintain a valid audit trail for loss prevention and security.

Trailer Content Visibility

Quickly identify and access stock on hand to reduce inventory requirements, save costs and improve efficiencies.

Graphical User Interface for Touch Screen Devices

Use tablets in-cab, on premises, or in the guard shack to identify and validate loads arriving and leaving the yard.

BENEFITS

More Effective Planning

Managers can plan and track trailer positions as well as record trailer status, moves, inspections and security seal changes.

Improved Inbound Yard Visibility

Visibility is extended to carrier/vendor yards to document arrivals, facilitate departure gate checks and enable audit trail analysis.

Increased Security Compliance

Security measures ensure drivers are verified prior to yard entry and CTPAT regulations are met.

Detailed Historical Data

Users can easily access a detailed history of any trailer, its driver and yard activity, along with its current status.
