

# Simpler. Faster. Better.

Leading the way in eAWB

DESCARTES™

# Simpler. Faster. Better.

Every second counts in air freight. In a fast-paced and competitive market, carriers are leveraging the electronic Airway Bill (eAWB) to maximise efficiency, enhance customer visibility and provide further services. Although the benefits of the eAWB are clear, carriers require the right technology partner to enable success.

## With the Descartes eAWB solution, carriers can:

- Better comply with rapidly evolving cargo security filing requirements
- Seamlessly collect eAWB data elements from forwarders and Ground Handling Agents (GHAs)
- Increase the value and quality of information moving throughout an enterprise
- Quickly on-board with our world-class implementation team
- Be better equipped with extensible solutions to enable long-term benefits

Every second counts

A global leader

## Leading the way in eAWB

Descartes has been helping carriers move to more electronic processes for over 20 years. Our solutions range from an advanced web-based interface to comprehensive air messaging and more.

As the global leader in electronic air cargo (system-to-system) connectivity, our solutions connect thousands of logistics-oriented businesses, integrate with any back office system or can serve as an independent, stand-alone application.

Descartes has the proven industry experience to deploy eAWB solutions for carriers worldwide, improve performance, add value and achieve a higher level of compliance.

# The **benefits** of using Descartes eAWB

**Simpler** – With Descartes, implementing the eAWB is a streamlined and simple process. Our systems can help boost forwarder adoption to help carriers realise the benefits of the eAWB throughout operations.

**Better** – As a leader in regulatory compliance, Descartes can help airlines repurpose eAWB information to fulfil global security filing initiatives and meet record keeping requirements.

**Faster** – Our demonstrable track record, expert technical support and industry experience has enabled Descartes to quickly roll out eAWB collection platforms and comprehensive air messaging to carriers with a rapid time-to-value.

**Streamlined** – With the growth of the eAWB Single Process approach, Descartes' advanced message translation protocols can reduce complexity and minimise the IT workload on a carrier's business.

**Accessible** – Descartes provides easily accessible options for forwarders and Ground Handling Agents (GHAs) to submit all required eAWB details to seamlessly populate carrier platforms.

**Flexible** – Descartes also offers some of the most advanced capabilities available to standardise and automate air cargo and freight management operations, provide real-time shipment status monitoring and transmit tracking updates to customers.

**Connective** – With a proven ability to connect multiple parties, Descartes' solutions can provide airlines with the technology required to gather eAWB information to ultimately enhance the end customer's experience and strengthen client loyalty.

**Secure** – Our platform provides stable and encrypted connections to reliably exchange electronic airway bill information and more.

**Accuracy** – Our validation methodology helps to ensure that the airway bill data received is correct and properly formatted before it enters a carrier's system.

**Extensible** – Descartes' technology can expand with a carrier's needs in parallel to business growth as airlines expand into new regions and product offerings.

# Start using the Descartes eAWB solution today

Simply complete our sign up form at [www.descartes.com/get-started-descartes-eawb](http://www.descartes.com/get-started-descartes-eawb) and we'll contact you for an initial discussion.

Our team of implementation professionals will guide you through a series of questions to better identify your needs and provide a tour of our eAWB capabilities, community service options and messaging solutions.

Realise the cost savings and added efficiency of the eAWB with the industry leader in air cargo connectivity, and discover why Descartes is the preferred technology partner of airlines worldwide.
