INTERNATIONAL LOGISTICS

Expand globally and streamline international trade.

Descartes integrates **Denied Party Screening** into the NetSuite workflow automatically. Our comprehensive database of international restricted and denied party lists helps reduce risk and minimize potential fines.

With complex and changing **Customs Compliance** regulations, Descartes solutions help businesses classify commodities, electronically connect to government agencies, and automate the import and export process.

Powered by the world's largest repository of import and export **Trade Data**, Descartes can help to develop lists of qualified suppliers, track competitors' supply chains, and proactively monitor sourcing opportunities.

Descartes offers real-time **Inbound Container Visibility** for NetSuite. Our network is connected to over 300,000 carriers and parties including all major ocean and air carriers, as well as full truck and Less-than-Truckload (LTL) carriers.

WAREHOUSE AUTOMATION

Scale for growth without adding warehouse staff.

Descartes **Warehouse Automation** provides intuitive barcode scan-based receiving, inventory moves, picking, packing and more—all from industry-leading ruggedized mobile devices and smartphones.

By automating **Retail Compliance** for suppliers of the largest chains, Descartes helps streamline Advanced Shipment Notices (ASN), print compliant UCC 128 labels, reduce errors and minimize chargebacks.

Descartes provides **Small Package, LTL Rating & Shipping**, including the ability to automate business rules, rate shop across carriers and LTL, print labels, generate BOLs, and more.

Improve truck loading and unloading with **Dock Door Scheduling & Yard Management**, create better visibility to pickup and delivery schedules, lower warehouse labor and minimize carrier detention charges.

TRANSPORTATION

Improve customer service and lower fleet and transportation costs.

Descartes **Route Planning & Mobile POD** reduces fleet costs by up to $10,000 annually per truck, eliminates paper delivery, minimizes invoice paperwork, and decreases incorrect delivery credits.

Offer proactive customer service with **Carrier GPS Tracking**. Our solution delivers predictive Estimated Time of Arrival (ETA) and ensures that customers get the visibility they demand to plan receiving and downstream operations.
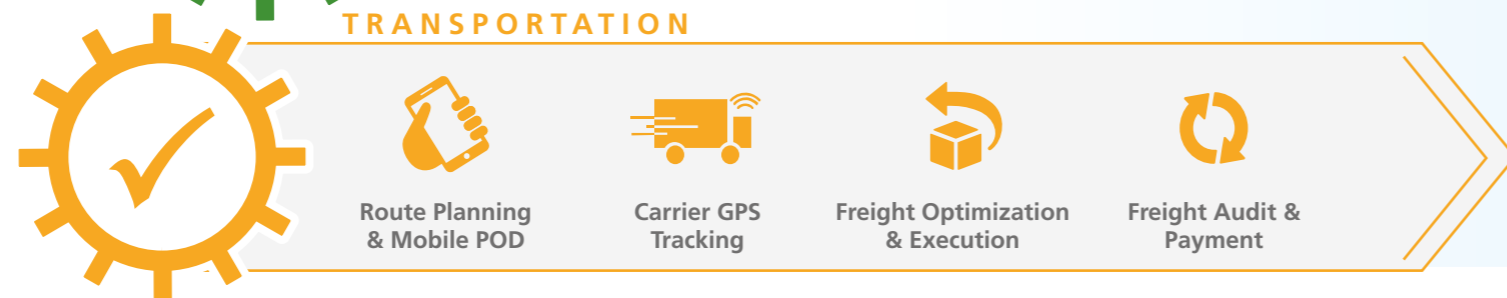

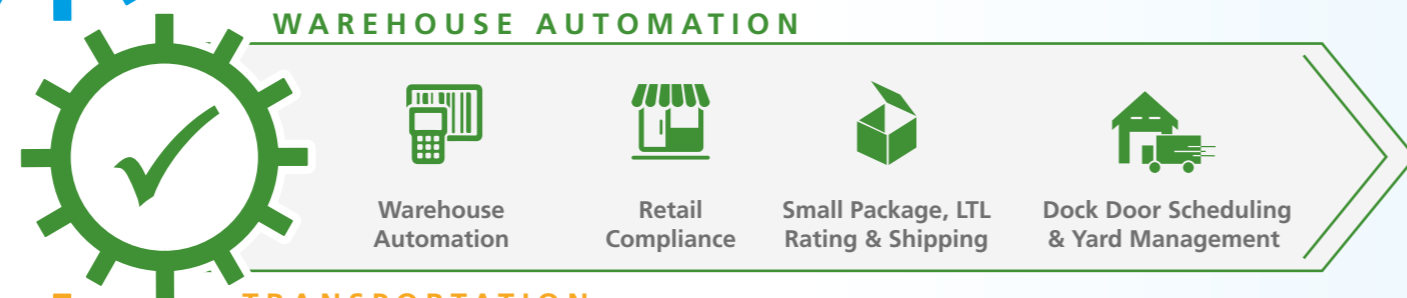

Lower third-party carrier costs by 5-12% with **Freight Optimization & Execution**. Take advantage of carrier contracts, consolidation opportunities, automated tendering, and streamlined connectivity to the Descartes Global Logistics Network™ (Descartes GLN™).

Receive carrier invoices electronically for **Freight Audit & Payment** across TL, LTL, and parcel carriers. Simplify operations with automated processes and save 3-5% on freight bills.

DESCARTES: COMPLETE LOGISTICS BUILT FOR NETSUITE
