

## Enhancing Productivity with Data Collection Technology

**Honeywell**, a Fortune 100 diversified technology company, is a leading manufacturer of high-performance data collection hardware, and provides software and connected solutions that improve productivity, workplace safety and asset performance for customers across the globe.

Honeywell offers a broad array of durable mobile computers for enterprises that require anywhere, anytime, real-time connectivity to business-critical applications and fast data capture capabilities. Plus, its handheld, industrial-grade barcode scanners provide superior durability and reliability, for fast-paced, high-volume scanning.

Honeywell's wide selection of mobile printers are designed to withstand conditions where dirt, moisture and temperature extremes are common, making them the most reliable choice for route accounting, direct store delivery and field service workers.

Descartes solutions incorporating Honeywell mobile computers, scanners and printers can help improve workforce productivity, increase operational efficiency and lower costs.

## How Honeywell Can Impact **Your Business**

Honeywell manufactures technologies that support connected products and solutions to help organizations:

Boost productivity to accelerate revenue

Drive service to increase customer satisfaction

Transform workforce performance

Reduce costs

Deliver superior bottom-line results

## Product **Snapshots**

### Dolphin CT60 Handheld Computer

- Mobility Edge hardware and software platform
- Android™ Enterprise Recommended device for future-proof protection
- Optimal power with LTE/NFC connectivity
- Unparalleled scanning performance with next-generation 2D imager
- Lightweight, rugged ergonomic design
- Comprehensive Honeywell repair service plans

### Dolphin CK65 Mobile Computer

- Mobility Edge hardware and software platform
- Supports four Android generations, starting with Android 8 (O) for future-proof protection
- Fast processor, advanced network connectivity, enhanced 1D/2D scanning, extended battery life
- Large touchscreen, keypad data input, real-time connectivity, and advanced data capture
- Withstands multiple 6 ft. drops to concrete
- IP64 ratings against dust and water spray

# DESCARTES™ Uniting the People & Technology That Move the World.

Descartes, the global leader in providing on-demand, software-as-a-service solutions (SaaS), is focused on improving the productivity, performance and security of logistics-intensive businesses.

The Descartes Global Logistics Network™ (Descartes GLN™) is the world's premier logistics community connecting thousands of trading partners globally across all modes of transport. It provides network members the flexibility to easily connect and collaborate. As part of this community, our customers have access to Descartes' Routing, Mobile and Telematics suite, an integrated platform of technology solutions for managing delivery operations.

## A Comprehensive Suite of Routing, Mobile and Telematics Solutions

Descartes' solutions suite supports the complete, closed-loop process associated with route planning, route execution, mobile and telematics for driver and vehicle performance. This single, integrated platform helps deliver a true command of operations by uniting critical fleet management processes including:

**Optimized** route planning and execution

**Integrated mobile** for planning, dispatch and delivery

**Real-time appointment scheduling**, new order assignment and exception management

**Fleet-wide visibility** with dynamic GPS-based map, schedule and asset views

**Advanced telematics** to improve safety and ensure compliance

### Single, Integrated Platform:

Route Planning  
Route Execution  
Mobile  
Telematics

## Our Solutions Help Fleet Operators:

**Maximize fleet** and mobile resource utilization and efficiency to decrease costs, improve service, increase productivity, and reduce your fleet's environmental impact.

**Unite planned** with on-road and at-stop route activities, using the latest GPS technology to adjust and respond to day-to-day realities.

**Interact with drivers** and field personnel in real-time to monitor assets in the field for planned vs. actual performance.

**Improve driver productivity** with optimized route plans delivered efficiently to a broad range of mobile devices.

**Provide real-time status updates** and information on key indicators (capacity usage, stop analysis, customer time window violations, route profitability, etc.)

**Better monitor** and manage driver behavior (speeding, excessive idling, hard braking, etc.) and vehicles (operating hours, maintenance, engine temperature, etc.).
