DESCARTES™

Descartes Global Trade Content

Uniting People and Technology with Trade Information

Descartes helps maximize the value of trade data by helping organizations work smarter. Our suite of solutions helps businesses achieve higher trade compliance rates, increase insight and leverage market research, reduce the risk of transacting with denied parties and minimize duty spend.

From fueling Enterprise Resource Planning (ERP) and Global Trade Management (GTM) systems with trade content, streamlining automation, improving classification processes, driving ecommerce solutions, providing business intelligence through global import-export data and more; the Descartes Global Trade Content solutions unite people and technology with the trade information they need to help power international commerce and improve compliance.

Descartes Datamyne™

With a comprehensive database of accurate, up-to-date import and export information, Descartes Datamyne™ delivers actionable intelligence for market research, sales insight, supply chain management, enhanced security, competitive strategy and more. The solution is powered by the world's largest searchable trade database, covering the global commerce of 230 markets across 5 continents. Manufacturers, shippers wholesalers, transport and logistics service providers, management consultants, legal practitioners, industry analysts and others use our exceptionally accurate and granular data to initiate growth strategies, explore new markets, benchmark performance, monitor commodity volumes and values, simplify trade data research, discover buyer-seller relationships and refine sourcing strategies.
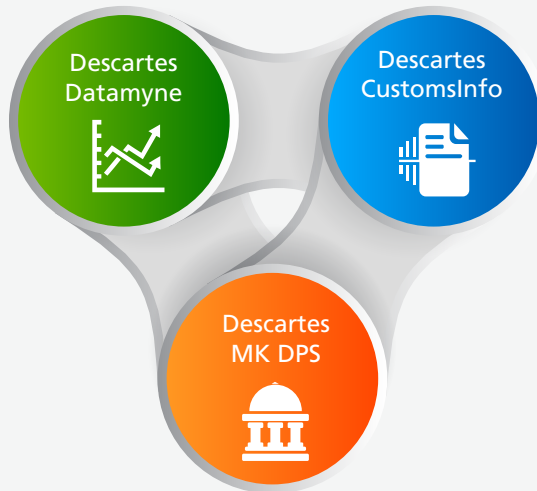

Descartes CustomsInfo™

With a vast database of data relating to regulations, rulings, duties and more, Descartes CustomsInfo™ helps clients minimize trade barriers. Some of the world's largest international ecommerce sites also leverage our powerful data resources to provide customers with more accurate landed cost information, improve the online shopping experience, add to overall compliance and reduce operating costs. Multi-national shippers, customs brokers, third-party logistics providers (3PLs), freight forwarders, multimodal carriers, compliance professionals and others use Descartes CustomsInfo to help build and maintain complex classification databases for their global operations.

Descartes MK Denied Party Screening™

Descartes MK Denied Party Screening™ (Descartes MK DPS™) provides organizations of all sizes with a range of options to quickly and efficiently screen customers, suppliers and/or trading partners against a comprehensive database of international restricted and denied party lists. Customers can tailor screening processes to fit their unique risk parameters and flag potential compliance issues for a prompt resolution. The offering also readily integrates to other systems for global trade, customer relationship and operational management.
