Descartes CustomsInfo™ HS Validator

Quickly Validate HS Codes and Apply Classifications Across Multiple Items

Monitoring World Customs Organization (WCO) changes and country-level Harmonized System (HS) modifications can be a labor-intensive process. Classifications can be modified without notice and many companies are unaware when changes are made or how to identify errors.

Some businesses simply require a streamlined, task-oriented solution to quickly validate classifications and check for inaccurate data.

Descartes CustomsInfo™ HS Validator is a stand-alone solution that enables companies to easily upload current products and HS codes. The solution tests the accuracy of existing codes, marks invalid classifications for review and vetting, provides an opportunity to correct or remap codes, and exports the results. The functionality is provided within an intuitive, web-based interface packaged in a rapid-deploy model.

HTS Revalidation												
Invalid HTS Codes by Country												
Business Unit		All		Item View		All Items						
View		Default		New View							Filter: None

												Record 1 to 5 of 5
<input type="checkbox"/>	Country	Affected HS Codes	Affected Items	Open	In Process	Revalidated	WCO Nomenclature Year	Invalid Items	WCO Review Items	Revision Date	Last Validated Date	
<input type="checkbox"/>	Australia	1	3	3	0	0	2017	3	0	09/08/2017	11/09/2017	
<input type="checkbox"/>	Brazil	1	1	1	0	0	2017	1	0	10/17/2017	11/09/2017	
<input type="checkbox"/>	China	1	1	1	0	0	2017	1	0	11/08/2017	11/09/2017	
<input type="checkbox"/>	European Union	3	3	3	0	0	2017	3	0	11/01/2017	11/09/2017	
<input type="checkbox"/>	United States	2	2	2	0	0	2017	2	0	10/24/2017	11/09/2017	

With the Descartes CustomsInfo HS Validator in place, companies can quickly locate codes that require correction, identify when items were last reviewed and more. Businesses are then presented with opportunities to adjust the classification.

Potential Benefits

- Leverage a rapid time-to-benefit with a quick launch model
- Simultaneously reclassify groups of products to boost efficiency
- Ensure accuracy with ongoing checks of country-level tariffs
- Rapidly identify errors with dashboard notifications and counts
- Better demonstrate reasonable care
- Enhance collaboration with role-based system of checks and balances

Features

- Deploy mass updates across multiple items
- Rapidly validate HS codes
- Use an easy-to-use import wizard and a standard export template
- Access proven best practice work flows
- Monitor codes continuously
- Deploy mass classification updates and approval decisions
- Review a detailed audit trail

With a vast database of data relating to regulations, rulings, duties and more, Descartes CustomsInfo helps clients minimize trade barriers. Multi-national shippers, customs brokers, third-party logistics providers (3PLs), freight forwarders, multimodal carriers, compliance professionals and others use Descartes CustomsInfo to help build and maintain complex classification databases for their global operations.
