

## Product Information

# Descartes CustomsInfo™ Manager Standard

## Powerful Item Compliance Functionality in a Rapid-Deploy Model

Companies need to accurately classify products, pinpoint documentation requirements and stay current with government changes as goods cross borders. For many businesses, robust customization and Enterprise Resource Planning (ERP) connectivity is not required. Instead, a quick and easy rollout of a powerful Harmonized System (HS) classification solution is a better choice to realize a rapid time-to-value.

Descartes CustomsInfo™ Manager Standard is a global trade item master and item compliance solution that offers a standardized upload function for tariff classification. The web-based offering comes ready with required fields and processes pre-applied for quicker deployment.

With a pre-defined import data wizard and template-driven upload functionality, Descartes CustomsInfo™ Manager Standard can help companies better classify goods and quickly reduce duty spend in a collaborative environment. The solution offers a central repository for all global item compliance tasks from within a proven, role-based, structured workflow.

The screenshot displays the 'Item Workspace' for 'Item 1 of 1'. The item details include:

- Bus. Unit: PB-BU Status: C\*0M\*0E\*0B\*0
- Added: 11/3/2016 Active
- Item Number: pb-1001
- Description: Remote controlled (RC) quadcopter drone.
- Division: ProdGroup: CAS Number: CoO: Not marked
- Item Notes: four motorized rotors which allows it to hover and fly. The item is imported with an indoor hull, which protects the rotors, an outdoor hull without protection, target attachment, carton tags, rechargeable lithium polymer battery, charger with three plug adapters and is packaged in a cardboard box. The battery provides approximately 15 minutes of flying time and a range of 20 feet
- Alt\_LangDescription:
- Item Specs: Length: 21" Width: 20" Height: Weight: 6 lbs UOM: Composition: Carbon Fiber

The 'Classification' tab is active, showing 'EU\_Details' and 'US\_Details' sections. The 'EU\_Details' section includes 'EU\_BTL\_Ruling', 'Ruling\_ExpDate', and 'EU\_Notes'. The 'US\_Details' section includes 'US\_Notes' and 'US\_Ruling' (N108937). The 'HS Mapping' section shows 'Germany' selected with HS Code 9503.00.79000 and 'United States' selected with HS Code 9503.00.0090. The 'Country HTS Codes' section shows 'Germany' selected with HS Code 950300. The 'HS Codes for Germany 28 Results Found' section lists various HS codes and their descriptions, including '9503.00.10000 UOQ1: NA Tricycles, scooters, pedal cars and similar wheeled toys; dolls' carriages' and '9503.00.21100 UOQ1: NA Ornamental dolls dressed so as to reflect the folklore characteristic of the country of origin, hand-made'.

Descartes CustomsInfo Manager Standard can help businesses rapidly classify goods, demonstrate item-level compliance, reduce duty spend and more from a rapid deployment, pre-packaged model.

## Potential Benefits

- Pre-configured settings reduce the need for extensive IT resources
- Quick implementation and on-boarding boosts the overall time-to-benefit
- An intuitive import wizard helps to improve productivity
- Advanced research functions enhance overall compliance
- A vast database of global rulings, duties, regulations and more helps to minimize trade barriers
- Accurate and current data reduces the risk of errors, delays and possible penalties

## Features

- Allows for mass updates across multiple items
- Offers intuitive collaboration tools for internal and external users
- Includes an easy-to-use import wizard
- Provides the ability to attach support documentation
- Comes equipped with standard reports including an HS mismatch report to help manage and track work processes
- Incorporates preferential duty rate visibility
- Includes a comprehensive user guide
- Supports the classification of sets and kits
- Incorporates proven best practice workflows and a role-based structure
- Offers audit trail capabilities to demonstrate reasonable care

---

With a vast database of data relating to regulations, rulings, duties and more, Descartes CustomsInfo helps clients minimize trade barriers. Multi-national shippers, customs brokers, third-party logistics providers (3PLs), freight forwarders, multimodal carriers, compliance professionals and others use Descartes CustomsInfo to help build and maintain complex classification databases for their global operations.
