

Product Information

Descartes OneView™ Customs House Broker (CHB) Solution

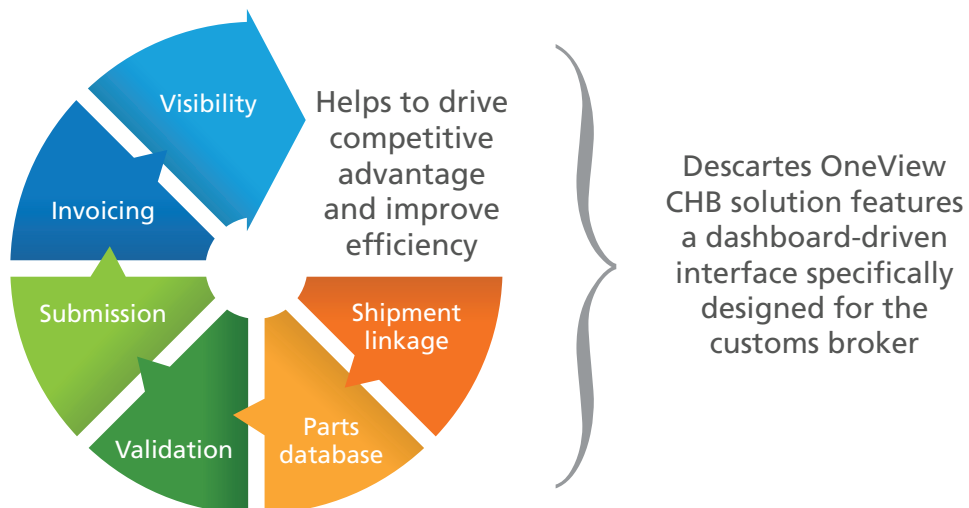

Go beyond US Customs entry filing with the Descartes OneView™ Customs House Broker (CHB) solution. This enterprise-level application improves the speed and accuracy of submitting entry data to Customs and Border Protection (CBP) and features a dashboard-driven interface specifically designed for the customs broker.

Engineered with advanced Message Queue (MQ) capabilities and a direct link to CBP, Descartes OneView CHB users can receive and react to responses and customs status messages by exception. A proactive alert functionality notifies users of actionable items including rejections, intensive exams, requests for electronic invoices, Temporary Importation Bonds (TIBs) expiration notices and more.

This template-driven solution allows users to quickly file standard entries, electronic invoices (AII), Remote Location Filings (RLFs), empty vessels/containers, out-port and Foreign Trade Zone (FTZ) entries. Descartes OneView CHB solution supports both entry-by-entry and aggregate reconciliation entry methods.

Descartes OneView CHB solution can help you manage and keep track of your clients' Automated Commercial Environment (ACE) as well as periodic daily and monthly statements. Users will also smoothly rollover into ACE functionality in parallel to CBP advancements.

With the ability to populate Bills of Lading (BOLs), create delivery orders and generate invoices, the Descartes CHB solution helps to jumpstart data entry and seamlessly bill for services rendered. Built-in reports provide details on cargo released, forecasted duty payments, liquidation, error statistics, shipments on-hold and clearance timeframes. Descartes OneView CHB solution also includes full-support of charge-tables for additional invoices, invoice line-items and classifications as well as standard charges for single-transaction bonds.

Bolt-on Tools and Additional Services

Potential integration with other OneView™ modules means the end of redundant data entry. Add-on the Descartes OneView™ Forwarder Enterprise solution for end-to-end air and ocean import/export shipment and accounting functionality. Additional options and modules include:

- OneView™ Events and Exceptions
- OneView™ Workflow Manager
- OneView™ Automated Export System (AES)
- Denied Party Screening (DPS)
- Web Tracking Visibility
- OneView™ Collections Manager
- OneView™ Document Management
- OneView™ Warehouse Lite
- Electronic In-Bond (EIB)
- Importer Security Filing (ISF)
- OneView™ Web Dashboard
- And more

Potential Benefits

- Tap-in to the Descartes Global Logistics Network™ (Descartes GLN™) to connect to thousands of carriers, Logistics Service Providers (LSPs) and other inter-connected parties
- User-defined templates, a customizable parts database and intuitive lookups help minimize data entry and improve customer service
- A turnkey product structure allows users to add-on modules in parallel to business growth
- Options to connect with in-house and legacy applications via Electronic Data Interchange (EDI)
- Link break-bulk files to entries to help reduce data entry and improve efficiency
- Powerful functionality is scalable from small, one-office operations to global, multi-national corporations
- Easily drill-down to entry detail in parallel to customer service inquiries
- System prompts help improve the accuracy and completeness of entry preparation
- Automated Clearing House (ACH) payments
- Assistance with US Lacey Act compliance
- Currency conversion
- Automated duty, tax and fee calculation
- Interface with Other Government Agencies (OGAs) such as the US Food and Drug Administration (FDA), Federal Communications Commission (FCC) and the Department of Transportation (DOT)
- Stay up-to-date with new US Free Trade Agreements (FTAs) and General System of Preferences (GSP) expirations
- Features a dashboard-driven interface specifically designed for the customs broker
- Use the in-line cargo manifest query to validate data prior to entry submission
- One-click coverage for end-to-end entry processes includes:
 - Standard entries
 - Electronic invoices (AIIIs)
 - Electronic invoices (AIIIs) with invoices by request
 - Remote Locating Filing (RLF)
 - Remote Locate Filing (RLF) with invoices by request
 - Empty vessel/container entries
 - Outport entries
 - FTZ admissions
 - Unaccompanied articles (3299s)

Features

- Easily create, view, email and print all customs-related documents
- Harmonized Tariff System (HTS) queries help to locate the exact code required
