# DESCARTES™

Descartes CustomsInfo™ Bulk Reclassification Updates

Streamline the HS Code Reclassification Process and Easily Schedule Updates Ahead of Time

Looking to save significant time and effort updating HS codes, such as those initiated by the World Customs Organization, U.S. CBP, the European Union or other customs jurisdictions around the world. Descartes CustomsInfo Manager's Future Validation can help streamline these classification updates by helping users identify which of their HS codes are subject to amendments and assist them with the reclassification process. When ready, users can schedule their update *en masse* to seamlessly coincide with the official changeover to the new HS codes and tariffs.

Solution Area(s)
Global Trade Intelligence

About the Product
Cloud-based functionality that helps organizations efficiently reclassify their parts and products as well as set the new HS codes to be effective when the updates officially go into effect.

TOP BENEFITS

- Save time researching new HS codes to replace those being phased out

- Easily schedule HS updates to match the official customs go-live date.

- Receive automated alerts on HS classifications that are no longer valid.

HS Code In Product Master → Validation Alert Received → Query Sent → HS Code No Longer Valid / HS Code Valid → Updated HS Code Identified → Product Master Updated

Save Significant Time and Effort Preparing for and Implementing Bulk HS Code Reclassifications

For countries that <u>pre-publish</u> HS code and tariff information updates, Descartes CustomsInfo Manager's Future Validation functionality helps organizations efficiently reclassify their products and schedule the transition to be effective on the official changeover date. For countries that <u>do not pre-publish</u>, Descartes provides a Revalidator tool that flags HS codes no longer valid so that users can update the classification accordingly. Future Validation and Revalidator are essential tools that help organizations stay compliant with ever-changing customs regulations on an ongoing basis.

FEATURES

Reclassification Assistance
Research new HS classification codes precisely and efficiently.

Straightforward Data Prep
Prepare new HS codes well in advance of new requirements going into effect.

Instantly See Out-of-Date HS Codes
Receive automated alerts that flag HS codes that are no longer valid.

Quick and Easy Implementation
Web-based functionality that is part of CustomsInfo Manager's suite of global import compliance solutions.

BENEFITS

Increased Operational Efficiency
Meet update requirements in a timely and accurate fashion to keep operations moving smoothly.

Easy Update Scheduling
Schedule go-live to coincide with the effective date via a click of the mouse.

Reduced Risk of Missing Updates
Be constantly in the know and minimize the risk of missing important new updates.

Strengthened Compliance
The Future Validation functionality significantly helps strengthen compliance on an ongoing basis.
