OFAC SDN Lists (20+ Countries): As part of its enforcement efforts, OFAC publishes a list of individuals and companies owned or controlled by, or acting for or on behalf of, targeted countries. It also lists individuals, groups, and entities, such as terrorists and narcotics traffickers designated under programs that are not country-specific. Collectively, such individuals and companies are called "Specially Designated Nationals" or "SDNs." Their assets are blocked and U.S. persons are generally prohibited from dealing with them.

OFAC Consolidated List: In order to make it easier to comply with OFAC's sanctions regulations, the office is now offering all of its non-SDN sanctions lists in a consolidated set of data files "the Consolidated Sanctions List". These consolidated files comply with all OFAC's existing data standards. In the future, if OFAC creates a new non-SDN style list, the office will add the new data associated with that list to these consolidated data files if appropriate. While the consolidated sanctions list data files are not part of OFAC's list of Specially Designated Nationals and Blocked Persons "the SDN List," the records in these consolidated files may also appear on the SDN List.
